Amendments to the Claims

Please amend Claim 1. The Claim Listing below will replace all prior versions of the claims in the application:

Claim Listing

- (Currently Amended) A neutral, An underivatized, aqueous soluble β-glucan preparation
 which enhances host defense mechanisms to infection and does not induce an
 inflammatory response.
- (Original) An underivatized, aqueous soluble β-glucan composition in a triple helix conformation which enhances host immune defense mechanisms without inducing detrimental side effects.
- 3. (Original) An underivatized, aqueous soluble β-glucan composition in a triple helix conformation having a high affinity to the glucan receptor on monocytes and which enhances microbicidal activity of phagocytic cells and the hemopoietic activity of monocytes, neutrophils and platelets.
- 4. (Original) An underivatized, aqueous soluble β -glucan composition in a triple helix conformation which is effective in mobilizing the hosts normal immune defenses.
